MEMORANDUM FOR: Chief, Staff Engineering Division, OC

ATTENTION : Chairman, Communications Requirements Working Group

SUBJECT : Communications Requirements Determination

REFERENCE : Multiple Adse Memo dtd 11 June 74 fr Chairman, Communications Requirements Working Group, same subject

1. We have reviewed the pertinent Office of Communications requirements as provided by the referent. The report concisely defines the spectrum of Agency needs and requires few changes or modifications.

2. Pursuant to your request we have listed minor changes and anticipated requirements on Attachments 1 and 2. OL Divisions and Staffs not listed have submitted negative reports. In those instances where your report is general in nature, we are listing projections submitted previously by Printing Services Division (PSD), OL, as we are uncertain that they have been subsumed in OC's report. PSD's requirements were discussed with [redacted] of your Division and he advised us to resubmit them. The narrative prepared for the Procurement Management Staff on Attachment 1 was not previously provided.

3. Plans and Programs Staff, OL, is the focal point for OL's communications requirements. If additional information is required, please contact [redacted]

Printing Services Division (PSD)

1. It is expected that within the next few years (FY 1976 and beyond) Printing Services Division will have need for a variety of data links. As data in digital form is used in increasing amounts as input to printing operations (in lieu of hard copy originals, etc.), batching and transporting of tapes to PSD becomes a limiting factor in publishing and distribution operations.

2. Also, maximum exploitation of presently available Computer-Output-Microfilm equipment and report printing with the planned Xerox 1200 Printing System with accompanying benefits in paper savings, the use of direct data links to the Office of Joint Computer Support (OJCS) will greatly facilitate PSD production.

3. Although detailed feasibility studies are not available at this time, the following items are considered potential requirements in the future:

a. Data link from OJCS to PSD main plant for use in expediting production of Computer-Output-Microfilm.

b. Data link from major publishers in Headquarters Building, such as OCI, OER, etc., to PSD main plant either through OJCS or direct to provide faster more efficient production of intelligence reports.

c. Data link from to PSD main plant as part of the overall automation plan to avoid daily transportation of tapes from Key Building to PSD and to permit a more efficient production schedule.

d. Data link from OJCS to PSD General Printing Plant for use with Xerox 1200 to speed up printing of computer-generated reports.

e. Data link from OJCS to PSD for use with proposed PSD MIS system.

4. For your information items c. and d. listed in paragraph three above are valid FY-1976 requirements. The time frame for the others is not known.
